PROFILE

Node.js developer with practical experience building APIs, dashboards, data workflows, and document automation tools. Comfortable across TypeScript, databases, cloud deployment, and test automation, with a focus on maintainable systems and reliable delivery.

TECHNICAL SKILLS

Front-End Development Vue 3; Accessible HTML and CSS; Vitest and jsdom	Back-End Development Node.js and TypeScript services; REST APIs; PostgreSQL; Zod validation
Document Automation PDF generation with Playwright; DOCX generation; Shared render models	Cloud and DevOps GitHub Actions; Environment-based configuration; Structured logging
Collaboration Requirements clarification; Code review; Technical documentation	

EXPERIENCE

Node.js Developer Northstar Sample Labs	Mar 2021 - Present
Worked in a product engineering team across TypeScript frontends, Node.js services, PostgreSQL databases, and cloud-hosted document workflows.	
- Built a TypeScript export service that generated PDF and DOCX reports from structured JSON data. - Reduced manual document preparation time by 45 percent through reusable templates and validation checks. - Improved API reliability by adding focused integration tests and clearer error handling. - Reviewed pull requests, documented runbooks, and mentored new contributors on project conventions.	

PROJECTS

Sample CV Generator Node.js, TypeScript, Playwright, DOCX, Zod
- Built a sample-first CV generator that renders ATS and polished outputs from one structured data file. - Added export smoke tests that inspect generated PDF and DOCX files for expected public-safe content.

EDUCATION

- Harbour City Institute - Graduate Diploma in Software Development
- Open Polytechnic Sample Campus - Bachelor of Information Systems

CERTIFICATIONS

- Sample Cloud Practitioner Certificate
